2 Fast detection of communication patterns in distributed executions
Thomas Kunz, Michiel F. H. Seuren
November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**
Full text available: 📄 pdf(4.21 MB)   Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

An adequate delivery system for user documentation addresses the problems of easy access, versatile publication, convenient administration, and good document quality. At the

National Magnetic Fusion Energy Computer Center the DOCUMENT program helps solve these problems by providing a high level of service through strategies that can readily be exported to other contexts. Dividing machine-readable documents into keyword windows permits fully online, subject-oriented ...

8 Personalised hypermedia presentation techniques for improving online customer relationships
Alfred Kobsa, Jürgen Koenemann, Wolfgang Pohl
March 2001 **The Knowledge Engineering Review**, Volume 16 Issue 2

Additional Information: full citation, abstract

This article gives a comprehensive overview of techniques for personalised hypermedia presentation. It describes the data about the computer user, the computer usage and the physical environment that can be taken into account when adapting hypermedia pages to the needs of the current user. Methods for acquiring these data, for representing them as models in formal systems and for making generalisations and predictions about the user based thereon are discussed. Different types of hypermedia adap ...

Tips:

- Don't over-specify: use only the search options you really need.
- Exclude "implied concepts": leave out words like *research* or *effects*.
- Check the format of your entry: some search options require specific spacing or punctuation.
- Use the Browse feature when available to find variations for your terms.
- Use more wildcards to search different word endings.
- Check that you are using parentheses correctly when you combine words with AND, OR, NOT.
- Check for misspelled words.
